

To Whom it may concern,

I am writing to inform you of the consequences of logging the South east region of NSW spotted gum forests in particular the forest adjoining Corunna Lake. It is so unfair and wrong in many ways, I am only 11 but I still want to express my concern for this beautiful forest. There are so many reasons I feel logging the forest is absolutely wrong.

Firstly, it seems unfair that people are logging an area that rightfully belongs to the Indigenous people of the area. The land is ~~their~~ theirs and our mother. It doesn't matter where they come from or who they are if they are destroying the forest they are destroying their land.

Secondly, people are destroying native animals habitats and homes. Imagine if someone destroyed your home, you wouldn't like it would you? And animals are going to become endangered or even extinct. ~~That~~ We have to protect our native animals.

Lastly, ~~The~~ trees are the givers of life and we are destroying them. Without trees we wouldn't be here today. If we destroy all of our trees we are basically destroying life.

In Conclusion, I hope I have convinced you to STOP LOGGING THE FOREST. I have many friends and family in this area and regularly visit it myself and I don't want the great Southern forest to be destroyed, it is the thing I love most about the area.

Yours Sincerely,

Emma Mitsak  aged eleven.
