Simplyfying from 4 instruments to 1 instrument

Q18. What parts of the draft Coastal IFOA do you think have a negative outcome on the management of environmental values or the production of sustainable timber? Why?

the parts which will make it easier to clear fell native forests. the fact that you will be able to do so without even checking for native wildlife such as koalas first. There are so many populations of native wildlife and fauna that will not be considered.

Q19. What are your views on the effectiveness of the combination of permanent environmental protections at the regional, landscape and operational scales (multi-scale protection)?

not answered

Q20. In your opinion, would the draft Coastal IFOA be effective in managing environmental values and a sustainable timber industry? Why?

No, while ever you put profit first the draft proposal can not be trusted. Up front you speak about cost cutting. Who cares about cost cutting? I care about protecting the environment over and above everything else.

Q21. General comments

What ever legislative instrument you come up with the first clause should be to the effect that in all actions and decisions the first priority must be to protect native forests and wildlife.
