The Manager

New South Wales Environment Protection Authority

I am writing regarding the Notice in the "Sutherland Leader" asking for submissions about the emission of polluted water from mining explorations in the upper area of the Georges River be allowed.

As you can see from my address my family have lived near the Georges River and for many years used it for water sports such as water skiing and swimming in the tidal pool at Coma.

I believe that if this practice is allowed it will no longer be safe to carry out these sports as the pollution flows on its way to Botany Bay.
