Re: Corunna Lake

To Whom it may concern,

Before rushing into logging around our pristine Corunna lake, please we beg you, PLEASE take time to find other solutions and options for resources for building/chipping, paper etc.

What good in the long term does this action bring?

So it seems the RFA has not been properly reviewed. The people, the leaders of ecology MUST be heard.

Learn more about the land + trees, Please!

- Public forestry has never, ever been sustainable. They have always been logged faster than they grow back
