

8th July 2018

To Whom it may concern,

I am writing with deep concern about the care and management of the South East region of NSW spotted gum forests - in particular the forest adjoining our pristine Corunna lake.

I am concerned about the ecological and environmental devastation that often lies in the wake of these actions.

My request is that you look into the Great Southern Forest group proposal.

We need to give careful consideration to both present and future generations - in all our decisions with regard to managing our natural resources.

As a member of the South Coast community I am requesting that the consultation period be extended.

We need a forest management plan that is aligned with community expectations so we may continue to enjoy our valuable forests in the present time and preserve them for future generations

Yours sincerely
