None

Q18. What parts of the draft Coastal IFOA do you think have a negative outcome on the management of environmental values or the production of sustainable timber? Why?

All

Q19. What are your views on the effectiveness of the combination of permanent environmental protections at the regional, landscape and operational scales (multi-scale protection)?

Damage done is irreversible

Q20. In your opinion, would the draft Coastal IFOA be effective in managing environmental values and a sustainable timber industry? Why?

Any legislation that opens the door to any old growth logging is not environmentally sound

Q21. General comments

The destruction of the Australian environment in the very short 200 years since European settlement is shameful and any further deforestation (especially that roughly disguised as being part of sustainability) is unnecessary, life-threatening and future generations should sue the Department for vandalism.
