**IP Address:** n/a

- Q1. **First name** Leif
- 
- Q2. **Last name** Lemke
- 
- Q3. **Phone** [REDACTED]
- Q4. **Mobile** not answered
- Q5. **Email** [REDACTED]
- Q6. **Postcode** [REDACTED]
- Q7. **Country** Australia
- Q8. **Stakeholder type** Individual
- Q9. **Stakeholder type - Other**  
not answered
- Q10. **Stakeholder type - Staff**  
not answered
- Q11. **Organisation name** Mr
- Q12. **What is your preferred method of contact?** Email
- Q13. **Would you like to receive further information and updates on IFOA and forestry matters?** Yes
- Q14. **Can the EPA make your submission public?** Yes
- Q15. **Have you previously engaged with the EPA on forestry issues?** Yes
- Q16. **What parts of the draft Coastal IFOA are most important to you? Why?**  
Any thing which will protect the natural environment.
- Q17. **What parts of the draft Coastal IFOA do you think have a positive outcome on the management of environmental values or the production of sustainable timber? Why?**  
None

**Q18. What parts of the draft Coastal IFOA do you think have a negative outcome on the management of environmental values or the production of sustainable timber? Why?**

Were little has been done to protect the environmental values of the public estate.

---

**Q19. What are your views on the effectiveness of the combination of permanent environmental protections at the regional, landscape and operational scales (multi-scale protection)?**

Read my comments

---

**Q20. In your opinion, would the draft Coastal IFOA be effective in managing environmental values and a sustainable timber industry? Why?**

No

---

**Q21. General comments**

Submission to the draft Coastal IFOA review. The things about Australia which are unique, apart from the Indigenous people, are the flora and fauna and the ancient landscape. As Australians we have an obligation to protect the natural environment to the best of our ability. To that end we have reached the situation that all remnant natural vegetation on public land should be protected. What is the point of having a high living standard in this country if future generations are paying the price for that in the form of lack of fresh water and the effect of the ever increasing Global Warming. I have witnessed the clear-felling of the local forest in spite of the assurances from Forest NSW that habitat flora would be protected. If the timber industry wants to continue operating they should acquire their own source material, in this case plantations, like most other industries. Regards
