- Q1. **First name** Sally
-
- Q2. **Last name** Hook
-
- Q3. **Phone** [REDACTED]
- Q4. **Mobile** [REDACTED]
- Q5. **Email** [REDACTED]
- Q6. **Postcode** [REDACTED]
- Q7. **Country** Australia
- Q8. **Stakeholder type** Individual
- Q9. **Stakeholder type - Other**
not answered
- Q10. **Stakeholder type - Staff**
not answered
- Q11. **Organisation name** not answered
- Q12. **What is your preferred method of contact?** Email
- Q13. **Would you like to receive further information and updates on IFOA and forestry matters?** Yes
- Q14. **Can the EPA make your submission public?** Yes
- Q15. **Have you previously engaged with the EPA on forestry issues?** No
- Q16. **What parts of the draft Coastal IFOA are most important to you? Why?**
I don't like any of it. What is important to me is that the forests are being plundered.

Q17. What parts of the draft Coastal IFOA do you think have a positive outcome on the management of environmental values or the production of sustainable timber? Why?

None of the draft Coastal IFOA has a positive outcome on the management of environmental values but yes, the timber companies will be well pleased. They have the government's go ahead to drastically impinge on our current forest stands for the wood supply. Let me tell you there is no end to human consumption and growth so the timber will be taken until there's nothing left.

Q18. What parts of the draft Coastal IFOA do you think have a negative outcome on the management of environmental values or the production of sustainable timber? Why?

All of it. The environment will suffer, the wild life will suffer, the water and the soils will suffer. The whole thing is a complete disaster. Global warming is real, tangible, imminent, happening NOW. We need our forests - our precious forests - to be protected at all costs.

Q19. What are your views on the effectiveness of the combination of permanent environmental protections at the regional, landscape and operational scales (multi-scale protection)?

My views are that there are many ways to move towards sustainable growth without using our forests. The world is full of plastic. The oceans are full of plastic. Our scientists and entrepreneurs should be looking towards recycling our waste to make new building products instead of ransacking living systems like our forests.

Q20. In your opinion, would the draft Coastal IFOA be effective in managing environmental values and a sustainable timber industry? Why?

No. Because its all about money, not nature.

Q21. General comments

I am aghast at this proposal for destroying our natural living forests and environmental systems. Koalas are just one species that are seriously declining through logging. This government does not have MY agreement for raping and pillaging forests. Short term, short sighted, killers of nature.
