- Q1. **First name** Tachel
-
- Q2. **Last name** Gregg
-
- Q3. **Phone** not answered
-
- Q4. **Mobile** not answered
-
- Q5. **Email** [REDACTED]
- Q6. **Postcode** [REDACTED]
- Q7. **Country** Australia
- Q8. **Stakeholder type** Individual
- Q9. **Stakeholder type - Other**
not answered
- Q10. **Stakeholder type - Staff**
not answered
- Q11. **Organisation name** not answered
- Q12. **What is your preferred method of contact?** Email
- Q13. **Would you like to receive further information and updates on IFOA and forestry matters?** Yes
- Q14. **Can the EPA make your submission public?** Yes
- Q15. **Have you previously engaged with the EPA on forestry issues?** Yes
- Q16. **What parts of the draft Coastal IFOA are most important to you? Why?**
The impact on our native species + the future of their survival.
- Q17. **What parts of the draft Coastal IFOA do you think have a positive outcome on the management of environmental values or the production of sustainable timber? Why?**
This is in no way sustainable when our animal species already deemed threatened are at risk of extinction.

Q18. What parts of the draft Coastal IFOA do you think have a negative outcome on the management of environmental values or the production of sustainable timber? Why?

Many native animals such as the regent honeyeater + the swift parrot are listed as threatened. Their survival depends on specific habitats being protected. Our koalas are being pushed to the brink of extinction with the outright decimation of their habitat due to current logging laws. There is no recovery for 120 year old trees!

Q19. What are your views on the effectiveness of the combination of permanent environmental protections at the regional, landscape and operational scales (multi-scale protection)?

I am horrified that Australia is so blatant in its destruction of our land, disrespect of indigenous culture + outright abuse of our native species.

Q20. In your opinion, would the draft Coastal IFOA be effective in managing environmental values and a sustainable timber industry? Why?

not answered

Q21. General comments

Save our native species! Stop logging old growth forests! We can not recover our land, or animals + our pride in our country!

Q22. Attach your supporting documents (Document 1) not answered

Q23. Attach your supporting documents (Document 2) not answered

Q24. Attach your supporting documents (Document 3) not answered
